CSE 236 Assembly Programming Laboratory,
Offline- 2, Fall 2021, Section B, Mark: 20

Question:

Check if a year is leap year or not.

- Do not take the year from input.
- Access the year value from a variable
- If you try to take the year from input, I will deduct mark this time
- Finally, if a year is leap year then show it in the console. And if the year is not a leap year then also show it in the console.

Sample input	Sample output
Var year = 2020	Leap year
Var year = 2021	Not leap year

Deadline: 20th January, 2022, 11:00 PM
